Pumps

IS YOUR PUMP WORKING OVERTIME?

Your pumping equipment's efficiency can decrease as much as 25% before the equipment is replaced, according to a study from the U.S. Department of Energy. And unfortunately, the opportunity to replace or repair your pumping equipment is often overlooked because the inefficiency is not always apparent. A pump test can be a critical component in ensuring equipment is running effectively and efficiently.

WHY TEST?

When a pump is not operating efficiently, it takes more energy than necessary for the pump to perform. By having your pump's efficiency tested, you can determine if there is a problem with the pump's condition or if operating conditions have changed, as well as identify problems before a breakdown occurs.

With SRP's Custom Business Solutions program providing a \$350 incentive per pump test, this is a great time to evaluate your pumping system. Assessing your pump's performance can help you avoid interruptions to your operations, reduce energy costs, establish a proactive maintenance plan and improve overall operating efficiency.

SRP PUMP TEST PRELIMINARY ASSESSMENT

The Pump Test Preliminary Assessment tests selected pumps to give an initial evaluation of the overall efficiency of your pumping system. This assessment will also provide the estimated energy and cost savings, economic feasibility criteria and potential SRP rebates for recommended efficiency improvements. Testing is conducted by an SRP Qualified Service Provider (QSP) who specializes in pumping systems.

To be eligible, equipment must be for an operational and active pumping system in a non-HVAC application, such as municipal, agricultural or industrial. Additionally, the individual pump must have at least 25 horsepower (hp).

For more information, please contact your account manager or call **(602) 236-3054**.

ELIGIBILITY

To participate in Custom Business Solutions, customers must be served by an SRP retail electric commercial price plan. Assessments are available for:

- › Pumping systems for non-HVAC applications (municipal, agricultural or industrial) with at least 25 hp, excluding backup

FIND OUT MORE ON THE NEXT PAGE.

REBATES

Most equipment that reduces annual energy consumption and energy consumption during SRP's summer peak period is eligible for a rebate. You must receive approval of your rebate application before initiating any project. Because each project is different, savings are determined on a per-project basis. This requires that energy use be verified before and after installation to ensure that savings were achieved and you receive the full rebate.

EQUIPMENT REBATES

- › \$0.10 per kilowatt-hour for the first year of electricity savings, up to 50% of the incremental customer cost

ASSESSMENTS (PAID DIRECTLY TO QSP)

- › Up to \$350 per pump assessment
- › Up to \$3,000 for a preliminary assessment (for customers with E-60 series accounts)
- › 50% of the technical assessment cost, up to \$10,000
- › Remaining 50% of the technical assessment cost (additional \$10,000) if suggested improvements are implemented

Customers are subject to a maximum rebate of \$300,000 for all SRP energy efficiency programs.

HOW TO PARTICIPATE

If you are interested in rebates for equipment only, please skip to step 5.

1. Complete and submit a preliminary assessment application.
2. SRP's QSP will conduct the preliminary assessment.
3. Complete and submit a technical assessment application after reviewing the preliminary report.
4. The QSP will conduct the technical assessment.
5. Complete and submit an equipment rebate reservation request (optional).
6. Complete and submit an equipment rebate application.
7. Before purchasing, ordering or installing equipment, obtain written preapproval from SRP.
8. Purchase and install the approved equipment.
9. Complete and submit the installation notice.

Applications and other forms are available at savewithsrpbiz.com or by contacting the program administrator. Rebate funds are limited and available on a first-come, first-served basis. For more information or to check the availability of funds, go to the program website or contact the program administrator at **(602) 236-3054**.

SRP BUSINESS SOLUTIONS

SRP is committed to helping you save energy and money. We offer a rebate program for every size and type of business.

- › Standard Business Solutions
- › Small Business Solutions
- › Custom Business Solutions
